Face

A-Lift is a non-surgical facelift treatment that is proven to improve the skin's structure, reduce fine lines and wrinkles and firm the muscles in the face and neck. It uses a combination of microcurrent and nano-current technology. Unlike some anti-aging electrical treatments which can be uncomfortable, our clients find it a pleasant and relaxing treatment with visible results. For best outcomes we recommend 4 x weekly treatments and then a monthly maintenance appointment. Your therapist can tailor the treatment to address any particular areas of concern.
